**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-14, drawn to azabicyclic compounds with a 1,2-diazine moiety, their pharmaceutical compositions, a process for preparing them, and methods of using them.

Group II, claims 1-14, drawn to azabicyclic compounds with 1,3-diazine moiety, their pharmaceutical compositions, a process for preparing them, and methods of using them.

Group III, claims 1-14, drawn to azabicyclic compounds with pyridine moiety, their pharmaceutical compositions, a process for preparing them, and methods of using them.

Each group as set forth above lacks unity with each other group, i.e., there is no single general inventive concept. The unique special technical feature in each group is the identity of the group Y, which may be a 1,2-diazine, a 1,3-diazine or a pyridine moiety. The technical relationship among the inventions does not involve at least one common or corresponding special technical feature. The expression "special technical

Art Unit: 1624

feature" is defined as meaning those technical features that define the contribution which each claimed invention, considered as a whole, makes over the prior art.

Group I invention has a special technical feature not common to Groups II and III and would be expected to be useful other than as disclosed for the Groups II and III inventions, e.g., as having 5HT<sub>3</sub> antagonistic activity (EP Pat. 0 306 148). Group II invention has a special technical feature not common to Groups I and III and would be expected to be useful other than as disclosed for the Groups I and III inventions, e.g., as having cholinomimetic activity (EP Pat. 0 458 214). Group III invention has a special technical feature not common to Groups I and II and would be expected to be useful other than as disclosed for the Groups I and II inventions, e.g., for the treatment of gastrointestinal disorders (GB Pat. 2 208 385).

A telephone call was made to Mr. Edward J. Wilusz, Jr. on January 11, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1624

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cecilia M. Jaisle, J.D. whose telephone number is 571-272-9931. The examiner can normally be reached on Monday through Friday; 8:30 am through 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
